

## **WANTED: Naval Architect**

Full Time Position Wanted: Naval Architect

Christensen Shipyards, Ltd. is a premiere builder of "large" custom fiberglass yachts up to 165 feet. We are located in the beautiful Pacific Northwest on the Columbia River. Christensen is committed to high tech advances in all aspects of yacht design. We recently collaborated with Webb Institute in the design and tank testing of a 68 meter full displacement power yacht. These all composite power yachts will be engineered in Vancouver, Washington and will be built at our sister facility in Tennessee. They will be the world's first fully composite power yachts ever built to the stringent MCA Code of Practice for Large Charter Yachts over 500 gross tons. We are looking for someone who is highly motivated and capable of doing a broad range of engineering design work.

A minimum of 5 years experience in the composite boat building industry is required (preferably in power yachts).

The position responsibilities will include the following;

- Marine Structures
- Hydrodynamics
- Sea keeping
- Resistance and Propulsion
- Stability

The applicant should be skilled in the following software:

- AutoCad
- Rhino
- General Hydrostatics (GHS)
- Microsoft Excel

Please send your resume by mail or email.
