

- Underwriting for *ScholarPOWER Educational Forums*, offered weekly during the academic year. These forums are videotaped and broadcast and usually involve sponsoring company engineers and/or executives as speakers. Each sponsored forum will carry the name of the donor with the company logo prominently featured on the set. (\$4,500)
- *Discretionary program support* in any amount to help help defray the costs of professional staff, seminar facilities and interactive learning technology.
- *In-kind contributions* of supplies and equipment, as needed or requested [eg. workstations (new or less than 3 years old), calculators].
- Opportunities for *tutoring and mentoring*

- **Benefits for Corporate Donors**

Businesses that choose to participate in ScholarPOWER will enjoy a variety of advantages, beyond those of corporate philanthropy. Ongoing contact with top scholars improves recruiting efforts by giving companies early access to the best of tomorrow's engineers. Banquet sponsors also increase visibility and build good will, both on campus and in the wider community. In addition, all corporate contributors are recognized on MEPO's website, at various campus events, and in College—and, when feasible, national—publications.
